

# 3DLH

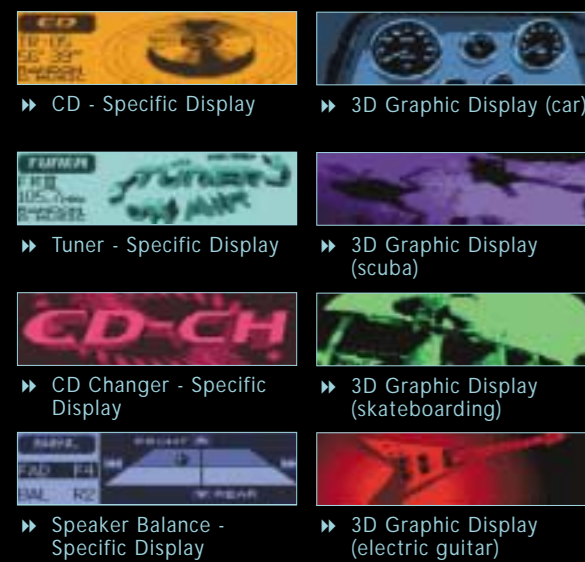

Introducing Graphics as Animated as You Are!

Round-Shaped Wireless Remote Control

ANIMATED 3D GRAPHIC DISPLAY CD RECEIVER KD-LH2000

JVC's new 3DLH Series features a full-motion 3D graphics display with variable color backlight for easy operation and visual confirmation of status and operations completed.

Sophisticated, smooth motion like PC graphics and seamless integration into a car entertainment system

The KD-LH2000 is anything but ordinary. With an innovative flip down face that allows you to easily change CD's without distraction, and it's ultramodern look these receivers are off the charts. To add to it's appeal it has a palette of 1,728 colors for the background display. 12 custom colors are preset, but you are encouraged to mix colors to create a background all your own.

JVC MOBILE ENTERTAINMENT

Take your mobile entertainment to the extremes!

**2002**

With so many variations in style and function for mobile entertainment, it's no surprise that JVC continues to be the world leader in audio and video technology. The introduction of the new JVC products along with constant technological advancement on existing products insures that JVC has the products to meet your lifestyle.

This year JVC features PC Audio ready MP3 playback and CD-R/CD-RW compatibility in mid-range models as well as high range. The new 3DLH series boasts an animated 3D graphics display that allows a new kind of operating feel with colorful and energetic images. JVC's new V2 Speaker Series power is boosted for a higher sound pressure that will blow you out of your seat. The ELKAMELEON is back and better than before with more expressive display graphics. JVC regular line of CD and cassette receivers has been expanded to bring you a selection with more variety in face design and operating feel as well as more color variations for user selection.

JVC Mobile Entertainment dares to excite your senses.

At the Edge of Technology, Art and Music.

A/V MULTIMEDIA CONTROL CD RECEIVER KD-SH909

With a Face Forged from Pure Aluminum

Stunning audio performance and multimedia versatility with CD, MP3, CD-R, CD-RW compatibility, as well as DVD/VCP control capability, make this receiver the ideal centerpiece for advanced in-car entertainment systems.

When loading a disc, the face automatically flattens. When playing a disc, you can adjust the face position. When leaving your car, you can detach the panel and take it with you for security.

Going beyond the next generation, JVC's "digifine2.2" Mobile Entertainment System brings you the future of car audio. A sleek, stylish design with a stunning aluminum finish. Full compatibility with MP3, CD-R, and CD-RW. Built-in DVD/VCP control. And advanced audio enhancement technologies to deliver superb digital sound. Digifine2.2 combines all the performance and versatility you'd expect from an in-car entertainment system.

**DIGIFINE 2.2 FEATURES**

- ▶▶ Power Output: 200W Max. (50W x 4)

- ▶▶ Pop-Out Rotary Encoder Multi-Control
- ▶▶ Multi-Function Wireless Remote Control
- ▶▶ Dot-Matrix Multi-Color LCD Display with Contrast Control
- ▶▶ Switchable Dimmer
- ▶▶ Detachable Control Panel with Carrying Case
- ▶▶ 2 Year Warranty

Dave Mustaine of Megadeth.

The Smart Anti-Theft Design.

CHANGER CONTROL CD RECEIVER KD-LX333

What they can't see, they can't steal. ELKAMELEON, JVC'S smart anti-theft system, turns the headunit totally invisible, making it blend evenly into your car's dash. ELKAMELEON lets you make your mobile entertainment system an extension of your lifestyle.

As you turn on the ELKAMELEON, the LCD display comes to life with brilliant colors, the rotary encoder pops out and the control panel slides out for easy access. When you insert or change discs, the control panel recedes into the unit and the LCD slides down to reveal the loading slot. While the power is off, the LCD unit is totally black and the control panel is concealed inside the unit, blending into the car's dashboard.

▶▶ cEQ Features five custom-made EQ presets for five types of music - ROCK, CLASSIC, POPS, HIPHOP, and JAZZ - which you can further touch up as you like. You can create one more EQ on your own by adjusting bass, treble and loudness settings. cEQ's source-specific EQ means you can 'link' an EQ to each individual source - ROCK to FM, for example.

(\*BBE instead of loudness with ELKAMELEON)

**EL KAMELEON FEATURES**

- ▶▶ Anti-theft ELKAMELEON System IV
- ▶▶ Power Output: 200W Max. (50W x 4)
