INPUT SOLUTIONS

XA-110IP

iPod® Controller

- Direct Connection to iPod®
- Direct Access to Files, Folders and Playlists
- No Set-up, Plug-n-Play
- Scrolls Up to 24 Characters
- Charges iPod® when Connected

This adaptor lets you use any Sony car stereo with changer control capability with your iPod® digital music player. It allows for complete control of the iPod® via your Sony receiver and view information on screen.

FRONT PANEL AUXILIARY INPUT

Sony makes it easier than ever to connect most portable audio devices to your car audio system by adding a front panel auxiliary input. With just a simple mini-jack cable, most MP3 players or portable DVD players can be plugged into a Sony Xplod audio system.

This feature is included in the CDX-GT100, CDX-GT200, CDX-GT300, CDX-GT400, and CDX-GT10M.

"DRAG & DRIVE"

Sony has created a way for music fans to have large, personalized collections of songs in their vehicles without the hassle of scattered CDs or MP3 players. With the Sony MEX-1GP, your music is stored on the detachable faceplate of your stereo. When the faceplate is removed from the receiver and connected to a Windows® enabled PC, it is recognized as an external drive. With the provided USB cable, users can quickly transfer and save MP3 and WMA files to the faceplate.

"AUX LITE"

Sony makes it simple to play a portable audio device, video system, or anything else through car stereo. In Sony head units with the AuxLite feature, the changer control audio input can substitute as an auxiliary input instead. This feature is included in the CDX-GT500, CXD-RA700, MEX-1GP, CDX-R505X, CDX-F605X, CDX-GT705DX, CDX-GT805DX, and CDX-F50M.

SAT RADIO READY

Any 2006 Sony Mobile Head units displaying the SAT Radio Ready logo have the ability to integrate seamlessly with either XM or Sirius satellite radio services.

HeadUnits

SATELLITE READY

SIRIUS

SATELLITE RADIO

If you are asking yourself which Digital Satellite Radio Service to go with, we can help. Either one! All 2006 Sony Mobile head units displaying the  have the ability to integrate seamlessly with XM or SIRIUS tuners!

CDX-GT400

- ✓ 1-9/16" Cone Mid
- ✓ 5/16" Dome Tweeter
- ✓ 5/16" Dome PEI Super Tweeter
- ✓ 140W Peak Power (30W RMS)

Car manufacturers typically wait until the end to decide where the speakers are going to be placed. Unfortunately, by that time, it usually ends up being where they will fit! Sometimes it's in the dash, low in the door, maybe even in the kick panel playing to your ankles and most likely in a shape that is far from the traditional "round."

Over the years, vehicles have had an increase in the "out-of-round" type speakers that add to the difficulties of installing an aftermarket speaker. Not only do you need a specific size and shape, but now you may encounter special requirements for mounting, too!

Sony Mobile includes a universal mounting adaptor with the XS-V4642A to make installation a snap, no matter what your requirement: Surface mount, flush mount, even under mount with or without tabs! It really can't get any easier...unless you talk your friends into installing them for you!

marine

CDX-F50M CD Receiver/MP3 Player/ Changer Controller

- ✓ Flip-down Detachable Faceplate

- ✓ Wired Remote Control for all Sony Head Units w/UniLink Changer Control & Wired Remote Capability
- ✓ Waterproof Marine Design
- ✓ Sat Radio Ready, iPod® Control Ready

MARINE

Hey, Captain! Did you ever notice that the opening for a radio in your helm is usually directly beneath a cup holder? And to make it worse, the cup holder has drain holes in it!

Every Sony Marine head unit comes with a drip panel just to aid in the fight against moisture intrusion. On the inside, we added a conformal coating to the entire circuit board to further protect against corrosion.

The faceplate is protected, too! We have treated it with a UV coating to prevent yellowing and fading. Even the display was redesigned specifically for outdoor use. There is a negative segment, monochrome display that is viewable even in direct sunlight, and the red key illumination means you won't miss a preset!

XS-1610W / XS-1610B 6-1/2" Marine Speakers

- ✓ 6-1/2" Dual Cone
- ✓ 80W Peak Power (40W RMS)

XS-1620W / XS-1620B 6-1/2" Marine Speakers
